

PHOTO CONTEST

CAPS | ACEAU

Resilience: Planning for Dynamic Futures

The CAPS-ACÉAU 2011 conference seeks to bring together students and professionals, building lasting relationships and enhancing professional development.

In recognition of Waterloo Region being a Digital Media Hub and the CAPS-ACÉAU conference being a venue for students to demonstrate their ingenuity (*yes, that was a Thomas Homer-Dixon reference*), the photo contest will use the **digital-media projection system atop Kitchener City Hall** to display a series of winning photographs.

Use a digital camera to capture photographs (max. resolution) that creatively ***demonstrate Resilience Planning in your school's region***. We hope for the images to portray your home region, while demonstrating examples of resilience and planning.

Store photos on a USB memory stick and bring to Waterloo. We'll take care of the rest.
